PREFATORY NOTE

The completion of the first volume of the "Monthly List of State Publications" affords an occasion for expressing to the officers of the various states the thanks of the Library of Congress for their cordial cooperation in its publication. The efforts made by the state officials, and especially the state librarians, to furnish the documents promptly have been of material assistance in the compilation of the List. With the continuance of this support, it is hoped that a List which will be comprehensive in the full meaning of the word will eventually be attained.

My predecessor, Dr. J. David Thompson, who inaugurated this List, had intended to publish a cumulative subject index at the close of each quarter, but the amount of time required for the preparation of such an index proved to be too great a tax on the resources of the Division of Documents, and for the present at least it has been decided to restrict this feature to an annual supplement.

HENRY J. HARRIS
Chief of the Division of Documents

January, 1910

WASHINGTON
GOVERNMENT PRINTING OFFICE
1910

PREFATORY NOTE

With this issue the Library of Congress commences the publication of a periodical list of current documents received from the states, territories, and insular possessions of the United States. In order that this may approximate to a complete record of such material issued, state librarians and other officials charged with the distribution of documents have been invited to cooperate in its preparation by forwarding to the Library of Congress a copy of each state publication not later than the last day of the month in which it appears. In response to this invitation promises of cooperation have been received from a large majority of the states, and efforts are being made to establish in the remaining states satisfactory arrangements for supplying the material desired.

The list will, as a rule, be published monthly; the titles for two or three months may, however, be combined in a single issue whenever they are considered insufficient to form separate numbers. A subject index will be added quarterly and will be cumulative throughout the year. It is hoped that the publication in this form, while serving the Library of Congress as a record of accessions and an acknowledgment of receipt, will at the same time meet the needs of libraries, legislative reference departments, public officials, and others interested in state activities.

The present number doubtless includes some arrears of 1909 which, in the absence of definite information as to date of publication, it would be difficult to separate from the January issues.

J. David Thompson
Chief, Division of Documents

Herbert Putnam
Librarian of Congress
Washington, D. C., March 1, 1910

The publications of each state are arranged in the following order: (i) legislature; (ii) departments, bureaus, boards, and commissions; (iii) courts; (iv) individual institutions and societies.

The serial numbers of Library of Congress catalogue cards are given at the end of the titles for which they are available.

INDIANA UNIVERSITY, *Bloomington.* Indiana University studies. nos. 1–8. July 1910. *68 p. illus. 8°. (Bulletin v. 8, no. 7.)*

"With this issue of the bulletin a sub-series is established, to be known as the University Studies, in which will be published from time to time some few of the contributions to knowledge made by instructors and advanced students of the University. At present it is not intended to issue more than two or three such numbers a year, but it is hoped ultimately to be able to enlarge the scope of the series. The Studies will be continuously numbered, and from time to time a title-page and table of contents will be issued, for binding them up in volumes."

INDIANA—Continued

INDIANA UNIVERSITY, *Bloomington.* Indiana University studies. nos. 1–8—Continued

Contents: 1. A note on the pharmacological action of uranium, by D. E. Jackson and F. C. Mann.—2. The effect of starvation for five generations on the sex-ratio of *Drosophila ampelophila*, by C. D. Holmes.—3–5. Studies on perchloric acid, by F. C. Mathers.—6. The preparation of ammonium-selenate, by F. C. Mathers and R. S. Bonsib.—7. A continuous function having nowhere a derivative, by R. B. Robbins.—8. The derivation of Poisson's equation by means of Gauss's theorem of the arithmetic mean, by K. P. Williams.
